The Advisar Advantage

Ready to start your next project? Browse this book for our product selection options, and visit our website for even more inspiration.

Your Advisar contractor will place your order and install your door, in a fraction of the time of traditional suppliers.

Easy. Fast. Simple.

Because whatever your style, *complicated* isn't part of it.

The Advisar Door System

GET TO KNOW YOUR DOOR.

A Gorgeous Entryway Made Just for You.

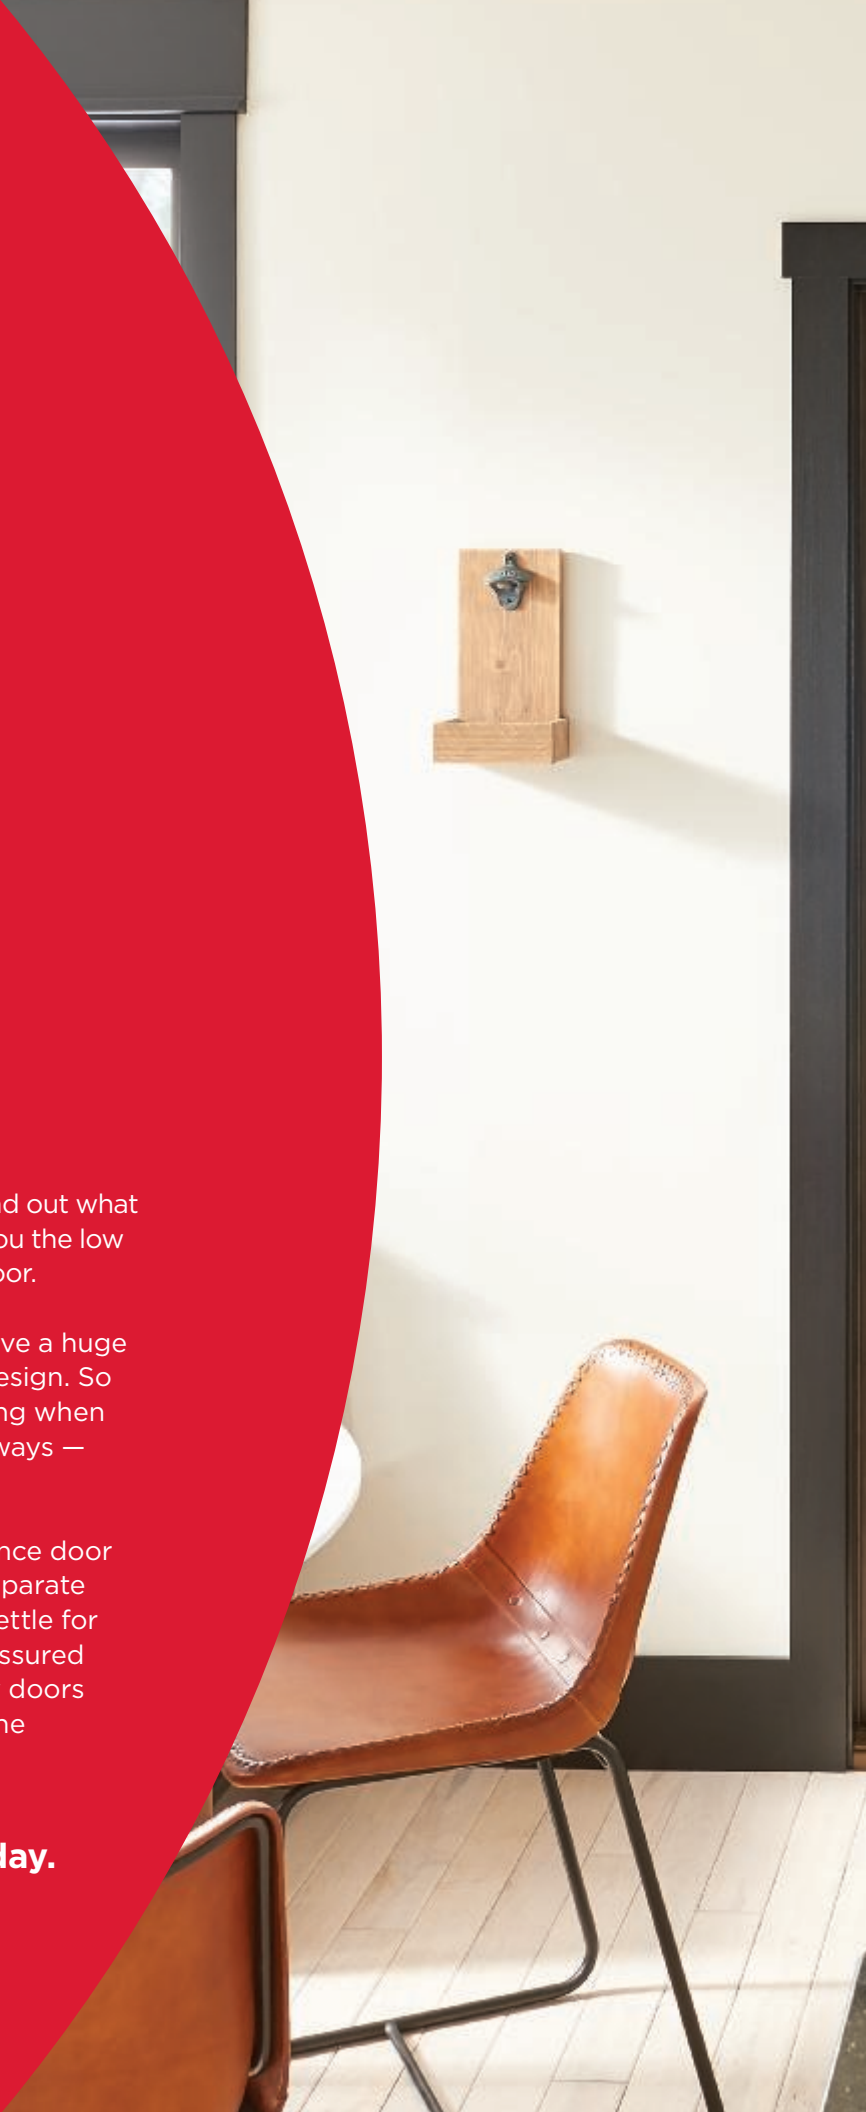

Ready to get started? Great! Now it's time to find out what makes up an Advisar door. But first, we'll give you the low down on how easy it is to select your perfect door.

Your doors make the first impression. They have a huge impact on your home's exterior and interior design. So why would you settle for boring and uninspiring when you can have beautiful and customized entryways — statement doors created just for you.

At Advisar, we offer complete, high-performance door systems crafted with important details that separate our products from the other guys. We don't settle for standard. When you rely on us, you can rest assured knowing that you'll receive the highest quality doors complete with precision finishes, top-of-the-line hardware and essential security features.

Discover the Advisar difference today.

Door Style: Cheyenne ½ Lite
Color: Rustic Cypress
Glass: Chord
Hardware: Arts and Crafts with Hammered Half Knob in Satin Nickel

The Advisar Door System

DETAILS MAKE THE DIFFERENCE

Not all doors are created equal. Some manufacturers substitute lower quality components to save a few bucks. But at Advisar, we don't accept mediocre. We assessed all available product options and selected the absolute best for your door system.

HIGH-PERFORMANCE DOOR SYSTEM

Engineered, weather-resistant construction

We deliver complete door systems. Every door is prehung in a high-performance frame that's engineered with advanced composite materials that, unlike pine, resist damage from rot and weather. Plus, our engineered sills block out air and water. Believe it or not, many others don't. As a result, you get a door with greater strength and less maintenance than traditional wood.

SQUARE EDGE VS. PROUD EDGE

Crafted to evoke the look of real wood

Other door manufacturers may build their products with a protruding proud edge and right away, you can tell it's not a real wood door. We don't do that. All of our doors are manufactured with smooth, square edges to evoke the look of real, solid wood.

PERFECTION DOWN TO THE SMALLEST FEATURE

Coordinated weather stripping colors that match, not clash

We put care and attention into every part of your door, ensuring that you're getting a masterfully designed entry way. For example, we let you pick your weather stripping color. Others might pick white as the standard, but with a black door, that just won't cut it.

Advisar Paints & Stains

UNMATCHED CONSISTENCY AND PRECISION

Make an impact the moment someone steps up to your entryway with exceptional aesthetic details that you simply won't find on stock doors. Our factory finishing techniques ensure a smooth, consistent look — every order, every time. Painting doors on the jobsite can lead to errors or damage. We avoid these issues by taking care of the finishing process so your contractor can focus on installing your new door.

Amelia Shores stain ●.....

AUTHENTIC WOODGRAIN TEXTURE

It's something you see, not feel

We apply all of our stains by hand to give an authentic wood appearance that's smooth to the touch like real wood. Other door manufacturers think a textured surface is acceptable, but when you look at real wood, you don't feel a woodgrain texture, you see it.

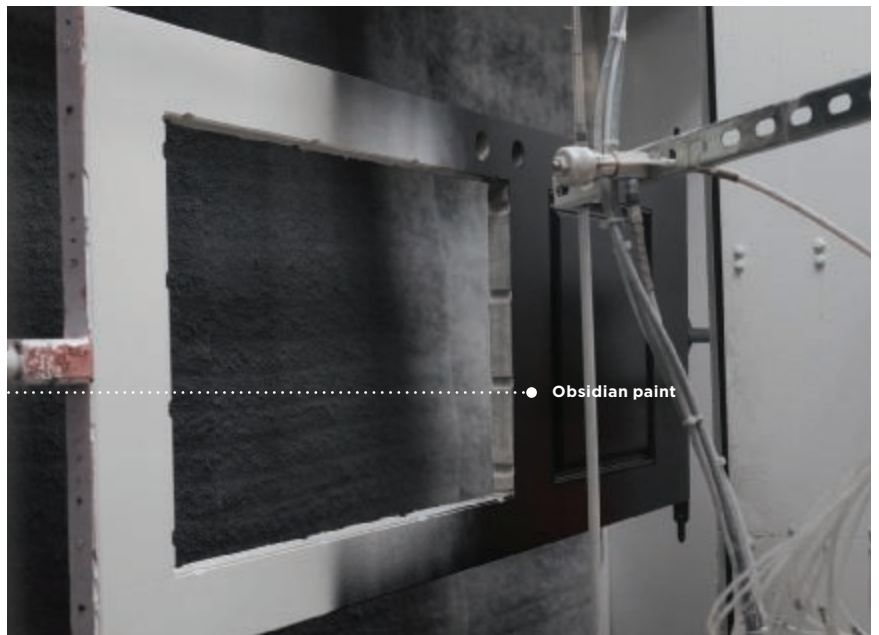

FACTORY-FINISHED PAINT & STAIN COLOR OPTIONS

**Expertly applied for
the highest aesthetics**

All of our doors arrive factory-finished in your choice of popular paint or stain color under factory-controlled conditions. Our state-of-the-art equipment, expert finishing techniques and baked-in seal help provide excellent consistency and durability, every time.

Ask your Advisar contractor about our paint and stain color cards. True stained wood grains help you better envision your beautiful new door system.

Advisar Glass & Hardware

GET STANDOUT STYLE WITH HIGH QUALITY OPTIONS

All of our doors are customizable and come with premium options like exclusive glass designs and name brand hardware. Unlike the other guys, we don't take shortcuts. We focus on the important details so you're left with a high-quality, stunning door that you can be proud of.

We've eliminated
unsightly plugs!

Premium designs packed with performance

Silhouette™ SEAMLESS GLASS FRAME

Smooth, plug-free design

Our Silhouette™ seamless glass frame adds an extra touch of elegance with its plug-free design that secures the glass internally. Say goodbye to unsightly fasteners or screw holes and hello to uninterrupted beauty. The exclusive frame design artfully conceals the fastening system for a seamless architectural appearance.

The look that's just right

Your selected hardware and locksets are beautifully finished to match and preinstalled for superior ease, quality and appearance. Hardware is sourced from leading brands and includes electronic lockset and three-point security locking hardware options.

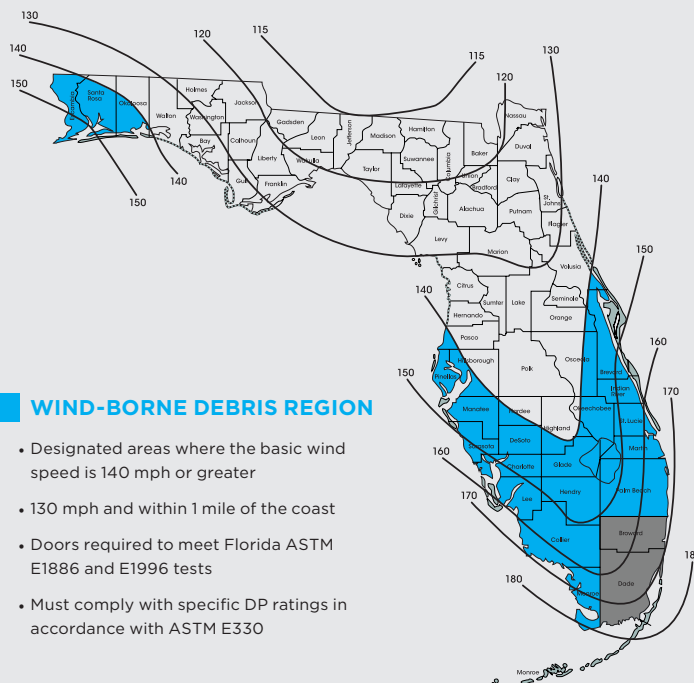

Doors delivered damage-free

With traditional door packaging, it's not uncommon for products to arrive damaged. That's unacceptable. So we invested in a new kind of packaging — highly engineered from top to bottom to protect our door systems from damage and you from frustration and delays.

IMPACT-RATED DOORS AND GLASS

Advisar systems are available with impact-rated doors and glass that meet high-wind and coastal region codes.* Protect your entryway from extreme weather by telling your contractor to include this upgrade.

Hurricane Prone Regions

- Designated areas where the basic wind speed is 140 mph or greater
- 130 mph and within 1 mile of the coast
- Doors required to meet Florida ASTM E1886 and E1996 tests
- Must comply with specific DP ratings in accordance with ASTM E330

* All impact glass has been tested for structural integrity and meets the requirements of Wind Born Debris testing.

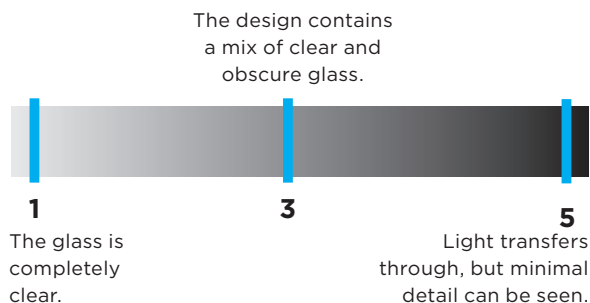

Hello options!

YOUR GUIDE TO GLASS

GLASS OPACITY (AND WHY IT MATTERS)

When it comes to doors and privacy, the glass you use matters.

Some glass styles you can see through easily, and some are harder to do so at a distance. We offer a variety of options that let you determine how much privacy you want, or don't want — and are available in a privacy rating from 1-5. The choice is yours.

LIP LITE VS. FLUSH GLAZED

Designs to Suit Your Style

Looking for decorative glass that's traditionally framed? Or maybe a more clean-lined, modern look?

We have you covered with our lip lite and flush glazed glass options. With the lip lite bold frame and smooth finish of flush glazed, we have options to suit any style.

IMPACT-RATED DOORS & GLASS

In the following pages of this guide, these icons indicate the level of security for each door and glass type.

If you're in a hurricane-prone area, fully HVHZ compliant options are available with impact-rated door panels, glass and sills.

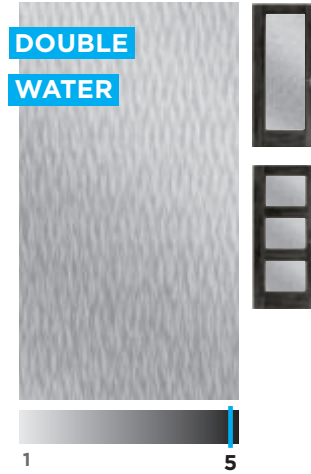

Not in a hurricane zone, but looking for added durability for your door? Some options can include impact-rated glass as an added safety feature.
